

Gaesdonck Parents letter

Nr. 4/2020-21

14.08.2020

Dear Gaesdonck-families

the first days of school are behind us and again you receive a parents letter. We promise not to continue this frequency. However, we do have some updated information:

Of course, these first school days were unusual in several respects: besides the heat wave, the compulsory wearing of face-masks as introduced by the state government made the lessons very special. Looking back, we can say this time as well: nothing is served as hot as it is cooked or as it was passionately discussed in advance, not least in the media. The world did not stop turning around and everything went well. Many teachers and their classes took advantage of the wide possibilities of the campus, sat in the shade with the children and took many breaks.

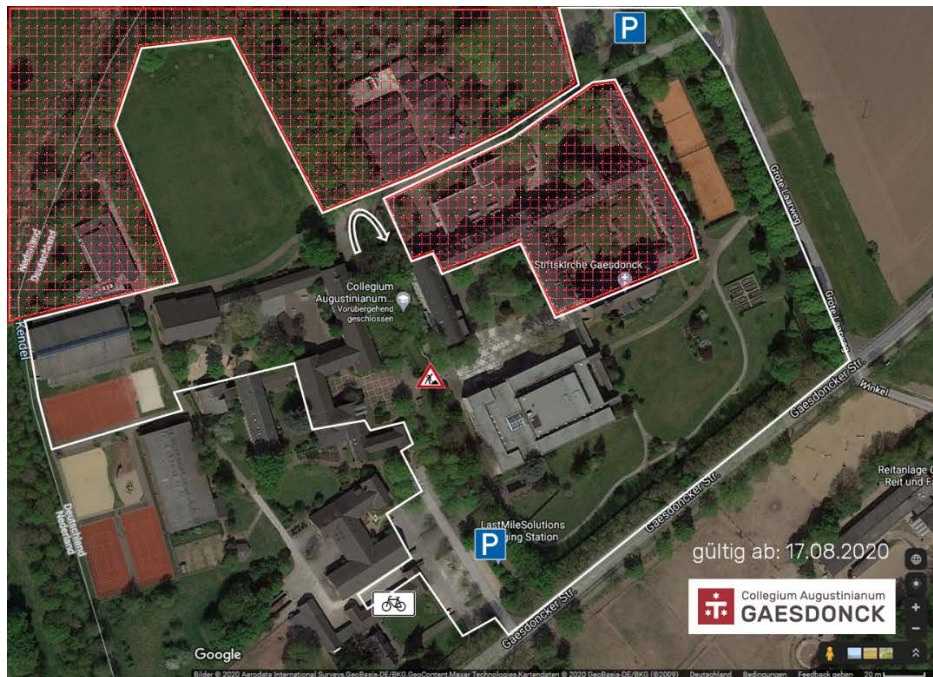

All in all, there was a relaxed, positive atmosphere on the whole site despite the heat. Many thanks to all who helped and especially to your children: our students, at all ages, adhered to the unusual rules and regulations with great discipline. **Especially our little ones did a great job!**

Routes/Zones

As already communicated in the last parents letters, the division of the campus into school and living areas is still a central element in the Corona-protection concept for our students in the two forms of boarding school. Entering the boarding school area is still not possible or only in exceptional cases. This zoning is a binding part of the school and boarding school regulations until further notice!

With validity from 17.08.2020 the way between the rear car park and the sports field behind the canteen is open for all students again. However, the adjacent green areas (orchard meadow, Trevi pond, area around the lake) continue to belong exclusively to the residential area of the boarding school or day-time boarding school. Access to the smoking area is free for external students over 18 years of age within the framework of the current regulations for short stays.

Unfortunately, the cloister, a popular shortcut from the rear car park to the school building, must also remain closed to external students! The zoning valid from Monday is as follows:

Internatsbereich

- Betreten und Befahren verboten
- Ausnahmen: Schülerinnen und Schüler im Vollinternat; Erzieher/-innen; Lehrer/-innen; Mitarbeiter/-innen; Schülerinnen und Schüler im Tagesinternat während des Nachmittags
- Zugang zur Mensa zum Mittagessen und Nachmittagskaffee für Schülerinnen und Schüler im OEx frei (Mundschutzpflicht)

Schulbereich

- Betreten während der Unterrichtszeit erlaubt
- Pflicht zum Tragen einer Mund-Nase-Bedeckung
- Juvenat ab 13.10 Uhr Internatsbereich

Bicycles

Never seen so many bikes on the campus. Surely also because of the warm weather our bicycle parking lot was more than well filled in the last days. At the request of our craftsmen we would like to point out that a road to the service buildings must be kept free.

Parents' meetings

We recall the parents' meetings on

Sunday, 23.08.2020 at 18.30.

We will inform you about the meeting-rooms and the allocation of parking spaces at the end of the coming week.

In the **context of the Corona pandemic**, **special conditions** also apply to these events. Therefore, this year only one parent can participate in the meeting at a time. The wearing of a mouth and nose cover (face-mask) is obligatory on the entire premises and during the entire time. To enter the campus, all participants are required to fill out a visitor's pass. In order to ensure the demanded traceability, seating plans are also recorded in every room. Both the visitor's passes and the seating plans are stored for 21

days after the sessions and will be then destroyed. You will find the visitor's pass at the end of this parents letter (available in German only). We ask you to bring it with you already filled out.

With kind regards from Gaesdonck campus

Dr. Markus Oberdörster
Director

Doris Mann
Headmistress

Michael Gysbers
Head of boarding houses
